

## ITW Air Management Awarded United Way Tremendous 25 for Eighth Year in a Row

The Cincinnati manufacturer, a local business unit of the global ITW organization, participated in fundraising efforts to support the United Way of Greater Cincinnati.

**Cincinnati, OH (March 2022)** – ITW Air Management, a leader in innovative air solutions for industrial applications, has ranked fifth on the United Way of Greater Cincinnati’s Tremendous 25 list. This ranking marks the eighth year in a row that ITW Air Management has achieved their fundraising goal and is listed among the Tremendous 25.

The Tremendous 25 list consists of United Way corporate partners that go above and beyond in supporting their community by having at least 25 employees and 55 percent participation rate, giving the most per capita. To be named in the Tremendous 25, the participating company is not large enough to be in the Top 25, but has at least 25 employees and 55 percent participation rates, giving the most per capita.

The bulk of the 2021 United Way Campaign at ITW Air Management was led by two individuals who planned, promoted, and implemented fundraising events that lasted for multiple weeks in the late summer of 2021. Derrell Woods and Philip Sereda organized mobile snack carts, cookouts, cornhole tournaments, raffles and more to gain participation and reach their fundraising goals. “Derrell and Phil worked extremely hard to make the campaign weeks exciting and inclusive for all of our employees,” said Barbara Stefl, Business Unit Manager at ITW Air Management. “With an event almost every day, they really made it enjoyable to participate and support a great organization.”
